

# WG06 June session

# ConfigHub, A.Richardson

The screenshot shows the ConfigHub website header with the logo and navigation links: Docs, Enterprise, Blog, FAQ, Contact Us, and a Sign Up button. The main content area features the headline "Take Back Control of DevOps" and the subtext "Configuration as data lets you see what will happen before it happens". Below this are two buttons: "Sign Up Now" and "Learn More". At the bottom of the main content area are two screenshots of the ConfigHub interface, showing a configuration tree and a configuration editor.

Backed by

Crane

"AI completely upends how the entire world writes, makes, and operates software entirely, not just code writing. The next few years are much more than just vibing about small changes to greenfield code bases. Enterprises need mature solutions to hard problems. **ConfigHub** is a missing piece to allow this rewrite to take place safely."

Jason Warner  
CEO & Co-Founder, Poolside

# WG06 Hackathon

- Location
  - Option #1 Bern, Switzerland before CNTF (to be validated by Swisscom)
  - Option #2: Bonn, Germany (Host DT)
- Date:
  - November 23-24th

# Event Format

- Automation Hackathon
  - Several topics exposed in WG06 web page: <https://wg06-workloads-lcm-gitops-59a50a.gitlab.io/events/hackathon/>
  - Table open to proposals until end of June
    - For each topic, specify
      - The Problem Statement
      - The project
      - The Admin details (contact, add you in the list if you are interested)
      - The Hackathon expectations
    - We extended the topics (not limit the activity to kubernetes operator) to open the game to CSP starting their automation/GitOps journey
      - Kubernetes operators
      - Tools
      - Pipelines

# Next steps

- Finalize date/location => Julie
- Select the topics
- Create the teams
- Use Summer WG6 meeting to introduce the topics, share community dev practices
- Get ready for the hackathon
- Organize the event
  - Hackathon activities: the goal is to create xVendor/CSP team working on the different topic
  - Possibility to integrate a limited number of lightning talks (including topics that would not have been selected)
  - And other ideas (Julie has already some)
